

AHMED DAHDOUH

SOC Analyst · Security Engineer

Zhengzhou, China · adahdouh123@gmail.com · ahmeddah1.github.io · github.com/AhmedDAH1 · linkedin.com/in/ahmed-dahdouh

SUMMARY

Software Engineering student specializing in cybersecurity, building production-grade blue-team tools with real threat intelligence integration. Four shipped projects covering SOAR automation, phishing detection, log correlation, and network reconnaissance — every project has automated tests, CI/CD, and Docker packaging. Seeking an entry-level SOC Analyst role.

TECHNICAL SKILLS

Security & Blue Team: Threat Detection · Incident Response · SIEM Concepts · Log Analysis · IOC Extraction · MITRE ATT&CK · Phishing Analysis · Threat Intelligence (VirusTotal, AbuseIPDB, Shodan) · Packet Analysis (Wireshark) · Vulnerability Assessment

Programming & Tools: Python (FastAPI, Flask, asyncio, Scapy) · REST APIs · PostgreSQL · SQLite · Docker · GitHub Actions CI/CD · Linux / Bash · pytest · Git

Learning: Penetration Testing (Metasploit, Burp Suite, Nmap) · MISP/OpenCTI · STIX/TAXII · CompTIA Security+ (Q3 2026)

SECURITY PROJECTS

SOAR-Lite — Security Orchestration, Automation & Response Platform

Python · FastAPI · PostgreSQL · Docker

github.com/AhmedDAH1/soar-lite · [6-min demo video](#)

- ▶ Automated full SOC triage workflow — alert ingestion via webhooks, IOC extraction, async threat-intel enrichment, YAML-based playbook engine, and one-click PDF/DOCX report generation.
- ▶ Reduced incident response time from 30+ minutes to under 2 minutes on simulated SIEM/EDR alerts.
- ▶ 53 tests · 84% coverage · GitHub Actions CI/CD · Docker Compose deployment.

Attack Surface Mapper — Enterprise Security Assessment Platform

Python · Flask-SocketIO · MITRE ATT&CK

github.com/AhmedDAH1/attack-surface-mapper

- ▶ Automated vulnerability scanning with MITRE ATT&CK mapping across 703 techniques and compliance checks against PCI-DSS v4.0, NIST CSF, and CIS Controls v8.
- ▶ Three interfaces (CLI, terminal dashboard, web UI) with Shodan exposure checks, Slack webhook alerting, and multi-format reporting (PDF/HTML/CSV/JSON).

Email Threat Analyzer — Phishing Detection Engine

Python · VirusTotal API · pytest

github.com/AhmedDAH1/email-threat-analyzer

- ▶ Parses .eml files, analyzes headers/URLs/attachments/body, and outputs a weighted 0–100 threat score with VirusTotal enrichment.
- ▶ Validated against the Nazario phishing corpus · 34 unit tests · GitHub Actions CI.

Log Threat Detector — SIEM-Style Log Analysis & Correlation

Python · Flask · SQLite · AbuseIPDB

github.com/AhmedDAH1/log_threat_detector

- ▶ Ingests SSH, Apache, and syslog files to detect brute-force attempts, port scans, and anomalies; correlation engine identifies cross-source attack patterns.
- ▶ Real-time Flask + WebSocket dashboard with AbuseIPDB enrichment, email alerting, and SQLite persistence.

EDUCATION

B.Sc. Software Engineering — Zhengzhou University, China

2021 – 2027

CERTIFICATIONS

- ▶ **CompTIA Security+** — in progress, target Q3 2026
- ▶ **Cisco Endpoint Security** — completed
- ▶ **Cisco Introduction to Cybersecurity** — completed
- ▶ **Python Security Fundamentals** — completed

ADDITIONAL

- ▶ **English Teacher** — Primary school (Grades 3 and 6), 2024 – present. Develop weekly lesson materials for ~60 students; strengthens written and verbal communication essential for SOC documentation and stakeholder briefings.
- ▶ **Languages:** Arabic (native) · English (fluent) · Mandarin (conversational) · French (intermediate)
- ▶ **Practice:** [TryHackMe \(SOC L1 path\)](#) · PicoCTF (Web Exploitation, Forensics)
